

Nitin Dadasaheb Mali

Close to **12 years** of experience as **UI Architect / Specialist / Senior UI Developer** with focus on **web, mobile** and **ecommerce** solutions. My constant goal is to create the finest possible solution for both my clients and their end users. I am skilled in all aspects of development life-cycle from initial requirements, design and development, to testing and final implementation.

EXPERIENCE

I had various opportunities to be part of different scale of companies over these years from early startups to mnc's. Which gave me hands on experience in customer interaction and requirement gathering. I was also part of both smaller and bigger development teams, where I had responsibilities of a sole UI developer to leading an entire team over these years.

SIEMENS — *Lead*

17th SEPT 2018 - Present

BOSCH — *Specialist*

06th OCT 2014 - 31st AUG 2018

HIGHLIGHTS

+ In BOSCH I successfully **migrated** HONDA iWorkshop phase 1 from **Angular 1 to 2+** before commencing phase 2.

+ **Angular 2.0 and Bootstrap reusable** codebase configured and developed by me was used across department as initial UI with testing setup. Which eventually saved initial setup time for UI projects.

+ In BOSCH I am the lead specialist in reusable UI component under which I created internal framework for responsive UI graphs based on Google charts and Vis.js for mobile and web apps.

+ **Google maps JS framework independent** component developed by me was used as approved lib api within department to track, draw routes, poi, geofence, markers and other features on maps.

SKILLS

Angular Js / Angular 2+

Javascript / AJAX

EDUCATION

Computer Science, VTU, Bangalore — *BE*

2002 - 2006

S.C.T Institute of Technology

Science — *High school*

2002

Kendriya Vidyalaya

+ As **UI lead** at Indpro, I was first to introduce **Cordova** and then successfully delivering **mobile app** with initial poc and requirements.

PROJECTS HIGHLIGHTS

I have been part of over 20+ projects spread across web and mobile apps in different UI frameworks and languages. Following are just a few of my recent work.

Honda iWorkshop [Angular 4]

Description: It's both web and mobile app for Honda service centers across India replacing their existing service software with iWorkshop. It's one solution for all workshop operation's from CAM, technician assignment, NFC reader, billing, rating and vehicle gate out.

Reliance JIO Connected Vehicles [Angular 4, MongoDB]

Description : Service provided as part of JIO services, where user can track his vehicle, performance, efficiency and other details through an OBD device. It's mobile app done in Angular as UI and MongoDB to store continuous vehicle data.

BOSCH CoSe [Ionic framework, Angular 4]

Description: Bosch connected service is integrated system, where data is captured and stored on BOSCH Cloud using 3G/4G enabled OBD devices. User can use this platform both on web and mobile to track vehicle performance and efficiency.

BOSCH ESI[tronic] web [Angular JS, Underscore Js, Grunt JS]

Description : The increasing number and complexity of systems and components installed in vehicles means that Service workshops require access to a wide range of knowledge. The ESI[tronic] Diagnose-Software can identify virtually any vehicle model and provide comprehensive data for workshops.

Appear Networks [Angular JS, Appear IQ, Grunt JS, Mysql, Bootstrap]

Description: This app was mainly for construction companies to follow up scheduled manpower, events & work on different construction sites. This app was for both android & IOS platform and was built on Appear's own cloud supported IQ.

Transparency International (Reporting app) [Angular JS, PhoneGap, Express, Gulp JS]

Description: This is a cross-platform app where user can search records and choose to display them on Google Maps. User can create and send a report for any "foul-play". Along with the web and mobile app, It also provides simple web GUI for managing record entries and reports.
